

# I'm Marc

a macOS Engineer and Full Stack Developer

*hi,  
I'm a music loving computer geek,  
who loves his Apple Macs and rock 'n  
roll. I also enjoy a good book and the  
occasional film!*

## Skills

**macOS**  
I am an Apple certified Technical Co-ordinator and have been working in IT Support for the last 8 years. I am also a Jamf Certified Associate and have my ITIL v3 Foundation certification. I also hold an interest in software development and have recently started learning Full Stack Development.

### MS Office

I have experience of supporting the Microsoft Office suite since Office 2003 right up to the latest version of Office365 on macOS. Applications supported include Outlook, powerpoint, Excel, Word and Sharepoint. Also have exposure to the 365 Admin console.

**Adobe CC**  
I have both used and supported end users running various version of the Adobe Creative Suite products. My main experience is with supporting Photoshop, Illustrator, InDesign and Premiere Pro.

### Front End Development

I have knowledge of HTML 5, CSS3 and Javascript, and have designed and coded websites by utilising my knowledge in these skills.

## Interests

**Music**  
I love Music and attend as many concerts as I can. I also play guitar, bass and am currently Learning to play the piano. I also write, record and produce my own music using Pro Tools and Logic Pro X.

### Books

I love reading both biographies and other non-fiction books, and also love fiction written by such authors as Terry Pratchett, Oscar Wilde, H.P Lovecraft and Edgar Allan Poe.
